WATERPROOF • INSULATED • PROTECTIVE

DRYSHOD®

WATERPROOF FOOTWEAR

There's a new footwear brand in town - Dryshod® Waterproof Footwear!

Dryshod is a new line of hard-working, durable, super-comfortable 100% waterproof footwear.

Our story begins...

Dryshod was developed to bring great waterproof footwear to hardworking farmers, hunters, gardeners and outdoor enthusiasts everywhere. With the ultimate goal of becoming the #1 brand in waterproof footwear, the team's complete focus and commitment is to create world-class footwear that will keep feet warm, dry and protected in the harshest weather and messiest conditions.

With a brand name that literally means "dry shoes", it is only natural that the mission of Dryshod International is to become the leader in waterproof-footwear products worldwide. The first step to achieving that goal was to launch the brand with a team of the most experienced and proven professionals the waterproof-footwear category has ever known.

The team starts with former Muck® Boot Company founder and owner, Jim Donohue. Jim created the first muck-style boot in the basement of his home in Danbury, CT back in 1998. Rather than sell his boots through traditional footwear stores, Jim worked with a network of rural distributors to specialize in selling muck-style neoprene and rubber products directly into the farm and ranch retail sectors nationwide. Initial product styles were a hit with rural customers and the line quickly expanded to styles for lawn and garden, hunting, pet care and specialty work boots. Distribution of the brand expanded into Canada, UK and EU markets before Jim sold the Muck Boot Company to a competitor in 2003. With the new Dryshod brand and product line, Jim is returning to his roots by creating super-durable waterproof footwear products for rural markets and partnering with the key sales and distribution groups that established special prominence to muck-style footwear over the past nineteen years. Total focus of the new Dryshod team will be to create world-class footwear that will keep your feet warm, dry and protected in the harshest wet and cold conditions.

For the best waterproof footwear, rely on Dryshod.

premium features... standard on all models

Dryshod® footwear products go “Beyond Waterproof” by providing weather-proof technologies to keep your feet warm, dry and protected in the harshest weather and messiest working conditions. The secret to Dryshod boots effectiveness is our exclusive self-insulating, waterproof DENSOPRENE® foam bootie construction and HYDROKOTE® water repellent textile treatment.

100% WATERPROOF - Designed and built to be 100% waterproof from top to bottom

5 mm DENSOPRENE® FOAM INSULATED BOOTIE - Keeps out the cold & wet - keeps in the warm & dry

DENSOPRENE foam is a super dense neoprene material that keeps the cold/wet out and the warm/dry in. This waterproof and self-insulating foam is naturally lightweight, buoyant and very comfortable - your foot and lower leg stay warm and protected in cold and wet conditions. In fact, they are constructed with the same material as deep-water dry suits. Dryshod materials exceed the long-term effectiveness of waterproof membrane materials and provide greater insulating properties per volume than fine-layered substrates.

HYDROKOTE® WATER-REPELLENT - No more soggy boots. Water rolls off and dries in seconds

HYDROKOTE water repellent is featured on all Dryshod footwear products. The textile cover on the entire bootie is treated with a nano-scale hydrophobic coating that repels water and mud on contact. This keeps the textile exterior surface of the boot from icing up in freezing temps and from retaining water in the fibers in wet conditions. With HYDROKOTE, soggy boots are a thing of the past.

4-WAY STRETCH BREATHABLE AIRMESH LINING - Moves the air to keep your feet dry and comfortable

All Dryshod footwear is lined with our exclusive breathable airmesh lining to keep your feet dry and comfortable. Structured-airmesh has a top layer and a bottom layer that is held apart by thousands of tiny vertical fibers. As you walk, air is pushed and circulated through the vertical fibers allowing the skin to breath thus keeping the boot dry and humidity-free within the boot's specified comfort range. Dryshod footwear linings are nonabrasive and hypoallergenic. When you see the orange 4-way stretch lining, you know it's breathable airmesh - NOW YOUR FEET CAN BREATHE!

EASY-ON/EASY-OFF - 4-way stretch materials and generous heel kick for easy-on/easy-off convenience

ROLL-DOWN CALF PIPE - Roll down the top to tuck in your pant leg or vent in warm temperatures

Soft, not stiff upper! The upper calf and topline areas are made of soft, flexible DENSOPRENE foam and 4-way stretch lining that will “stretch-fit” to virtually any calf. With the flexible upper, the pant leg can be worn over or inside the boot. In the event of heat and moisture build-up, the top collar on Dryshod Boots can be folded down to vent the boot.

GENUINE NATURAL-RUBBER OVERLAYS - Only genuine hand-laid rubber. No PVC, PU, or TPR

Genuine natural-rubber overlays also serve as a protective skin for Dryshod footwear. The rubber will stay flexible for years and will not cold-crack like footwear made of PVC, Urethane and TPR materials. Dryshod overlays are also double-reinforced in the toe area and triple-reinforced in the heel area. Dryshod outsoles are made of premium natural-rubber for long wear and optimum traction.

SUPERIOR STABILITY - Reinforced tuck board with rigid shanks for added stability

SUPERIOR FIT AND COMFORT - Slipper-soft comfort and sized to athletic-shoe standards

CONVENIENT BACK-PULL TABS - Sturdy pull tabs for easy-on/easy-off convenience and safety

Airmesh allows feet to breathe!

Breathable 4-Way Airmesh Lining

- Provides superior comfort and breathability by wicking away humidity and perspiration
- Made up of thousands of tiny vertical fibers that allow the air to circulate throughout the interior lining surfaces
- As you walk, air is pushed and circulated through the vertical fibers allowing the skin to breath - keeps the boot dry and humidity free
- Nonabrasive and hypoallergenic

5 mm DENSOPRENE® Foam Insulated Bootie

- Keeps out the cold and wet – keeps in the warm and the dry!
- Self insulating and waterproof
- Acts as a neutral medium between inside/outside temperatures
- Naturally lightweight, buoyant and very comfortable
- Material keeps foot and lower leg warm and protected
- Flexible 4-way stretch

HYDROKOTE® Water-Repellent

- No more soggy boots! Textile is treated with a nano-scale hydrophobic coating that repels water and mud on contact
- Water rolls off the nylon outer and dries in seconds keeping the exterior textile from icing up and from retaining water in the fibers in wet conditions
- Keeps boots dry

ChemFlex Chemical Resistant Rubber Overlay & Tread

ChemFlex Rubber

- ChemFlex chemical-resistant rubber withstands just about anything you can step in, pour on or splash through in the barnyard environment

available on:
Dungo
and
Barnstable

Polar Fleece Lining

- 6 layers of protection + EVA cold-blocking midsole = 7 layers
- Warmest boots in the Dryshod product line
- Additional 2 mm of polar fleece lining
- Comfort rating to -50°F

Polar Fleece For Extra Warmth

available on:
MOBU Max
and
Arctic Storm

Dryshod Footwear Anatomy

1. Reinforced tuck board with rigid shank
2. DENSOPRENE insulated bootie
3. Breathable airmesh lining
4. Form-fit sock liner
5. Natural-rubber overlays
6. DS1/DS2 - Cold-blocking EVA midsole
7. Rigid rubber toe protection
8. DS1/DS2 - Outsole toe bumper

Outdoor Boots

women

A woman with long blonde hair, wearing a wide-brimmed straw hat, a green long-sleeved shirt, a quilted vest, and tan pants, is sitting on large, dark rocks. She is pointing her right hand towards a river in the background. The background features a lush forest of evergreen trees and a mountain range under a cloudy sky.

**Warmth. Durability.
Comfort. Protection.
Adventure Awaits.**

**Dryshod's cushioned
comfort and guaranteed
waterproofing keeps you
outside doing what you love!
And the molded outsole
provides extra traction to
tackle all terrains.**
